Software Engineer with 2+ years of experience in Java enterprise application development within the BFSI domain. Skilled in designing, developing, testing, and deploying scalable applications using Java, Spring Boot, Microservices, REST APIs, SQL, and Kafka. Experienced in SDLC, CI/CD pipelines, production support, and Agile delivery. Frontend exposure in Angular, JavaScript, HTML, JSP, and Servlets with strong problem-solving and collaboration skills..

TECHNICAL SKILLS

Languages & Frameworks: Core Java, Java EE, Spring Boot, REST & SOAP APIs, Microservices, JMS, Python, streamlit

Testing & Code Quality: JUnit, SonarQube, Diffblue

Monitoring & Security: Splunk, Kibana, CitiSquad

DevOps & Platforms: Docker, Kubernetes, Git, GitHub, Bitbucket, OpenShift, Harness, CI/CD Pipelines, Jira (Kanban), Snyk, Copilot, Internal AI tools

Databases: Oracle, MySQL, Couchbase, MongoDB

Work Experience

Tata Consultancy Services (TCS)

System Engineer - Java Backend Developer | Citibank | BFSI Domain

Aug 2024 – Present

Roles & Responsibilities :-

Kolkata, India

- Developed and deployed microservices using Java (8-21), Spring Boot, and Spring Cloud, powering high-performance, and maintaining mission-critical liquidity and trade platforms for global banking operations that handled 2M+ transactions daily.
- Took end-to-end ownership of multiple APIs, handling requirement analysis, development, testing, deployment, and production support.
- Implemented event-driven architectures with Apache Kafka, building producer-consumer modules that improved real-time data streaming efficiency by 70%.
- Built high-performance REST and SOAP APIs, optimizing microservices to improve system throughput and response consistency under heavy transaction loads. Led the migration of legacy TIBCO integrations to modern Java-based services, eliminating license dependency and improving system efficiency.
- Worked extensively with CI/CD pipelines using GitHub, Bitbucket, Harness, and OpenShift and also familiarity with Jenkins and Maven for build automation.
- Ensured code quality and security compliance through tools like SonarQube, Snyk, Checkmarx and Diffblue eliminating vulnerabilities
- Developed backend services using Flask (Python) based on project needs and also worked on Streamlit for developing website for business Analyst.
- Collaborated closely with data engineering, DevOps, and QA teams in an Agile Scrum environment, achieving 100% sprint delivery success with zero production rollback.
- Wrote comprehensive JUnit test cases, improving test coverage more than 85% for all the APIs
- Implemented robust exception handling and global exception handling strategies to enhance system reliability.
- Adapted quickly to evolving client requirements, demonstrating strong communication and teamwork skills.

CERTIFICATIONS

- Oracle Certified Associate (OCA), Java SE 8 Programmer
- Oracle Cloud Infrastructure Certified Foundation Associate
- Oracle Cloud Infrastructure Certified AI Foundation Associate

EDUCATION

B.Tech in Electrical & Electronics Engineering - Anna University (2020-2024)

School: Sainik School Kazhakootam (2013 - 2020)
